Midterm Presentation

Danielle DiTomasso, Ryan Carrido, Tyler Samuels

Our Schedule...

- Per following our estimated project schedule, the main part of our website should consist mostly of HTML and CSS. Therefore, this has been the focus of our work thus far.

Task	Estimated Deadline
Project proposal and presentation	Friday, September 17th
Basic HTML and site structure of application	Tuesday, September 28th
Basic CSS and layout of application	Tuesday, October 5th
Midterm Presentation and Demo	Tuesday, October 15th
Database Implementation & JavaScript Framework	Tuesday, October 26th
Reminders feature	Tuesday, November 2nd
AJAX Implementation	Tuesday, November 9th
Addition of Social Media Feed from RPI union	Tuesday, November 16th
Finalizing and Project Review	Tuesday, November 23rd
Final Presentation and Demo	Friday, December 3rd or Tuesday, December 7th

Homepage

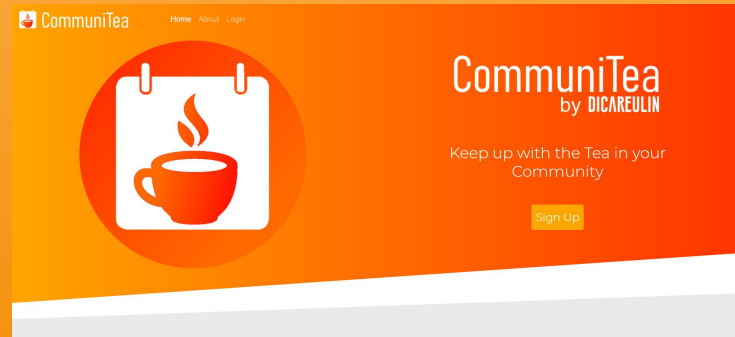

The homepage currently is only at its first draft and is open to have info to be added.

The page features a navigation bar on top, shape dividers, button hover animations. As for content it features access to the about page, login page, sign up page, and short descriptions about the application.

Current HTML Iteration

About Page

We have an about page that intends to describe our application, the goals of the application, and the purpose of it.

It currently features the bare minimum, with a navigation bar and text for the description. This area could be styled better in the future with pictures and CSS alterations.

Sign In and Sign up Pages: HTML

- Created forms that were consistent across both pages.
- Used labels to identify what information the user is filling out for that part (examples: username, email, password, etc).
- Created buttons for Sign In, Sign Up, and Cancel features.
- Linked the Sign Up and Sign In pages together.

Sign In and Sign up Pages: CSS

- Created multiple classes to organize functionality of the pages.
- Set visual aspects of the pages, such as background, coloring, and images.
- Added features such as margins and padding.
- Used “@media” feature to make the contents of the page fit any size screen.

CSS Padding Property
